

**Coins, Crown & Cabal** is an economic, political, and trade simulation set in medieval Europe. Build a thriving trading empire, amass wealth, influence, and power, and face tough social and political decisions. Gain the favor of the nobility, stay one step ahead of your rivals, and dominate trade in your county.

### ***Create your medieval trade hub***

Invest your wealth in the construction and improvement of amenities, production facilities, and housing for your villagers, shaping your ideal, thriving trade city.

Produce raw materials and refine them into high-quality goods to increase the value of your future trade commodities.

Get to know the strengths and weaknesses, worries, and needs of your workers over a shared tankard. Then, use your knowledge and their trust to unlock their full potential.

### ***Trade with other players***

Send trade convoys to neighboring villages, buy everything that brings prosperity to your town, and sell what you can spare.

Always keep distance, terrain, and the risk of bandit attacks in mind — ensure your trade routes remain safe and efficient.

Influence the player-driven economy in your county to your advantage and always stay one step ahead of your rivals.

### ***Intrigue, power plays, and conspiracies.***

Gain the favor of the nobility, secure seats in various councils, and expand your political influence. Complete tasks assigned by the Count or even the King himself — but be cautious!

Those who stumble in the game of intrigue will quickly face the consequences of their failures.

Engage with a variety of political and social events, and carefully consider your actions, as they carry weight...

and not all will tip the scales in your favor.
